KEYCALIBER

FOR NYDFS 23 NYCRR 500
Compliance Visibility, Risk Prioritization, and Control— purpose-built for New York's toughest financial cybersecurity standards

DESIGNED FOR ACTION
KeyCaliber Simplifies Compliance and Replaces Fragmented Costs

- Streamlines reporting for annual certification
- Reduces overhead by consolidating scanners and asset tools
- Supports auditors with evidence-rich logs and tracking
- Powers CISO dashboards with real-time risk and asset impact

Regulated Financial Institutions Must Meet Strict Controls

THE NYDFS MANDATE

- ➔ Enhanced asset inventory
- ➔ An endpoint detection and response solution to monitor anomalous activity
- ➔ Periodic risk assessments
- ➔ Vulnerability management (scanning + remediation)
- ➔ Implementing multi-factor authentication
- ➔ Boards/senior officers "sufficient understanding of cybersecurity-related matters"
- ➔ Audit trails, logs, and monitoring
- ➔ Annual compliance certification

WHERE KEYCALIBER FITS

Real-time asset discovery & inventory
(cloud, on-prem, shadow IT)

Continuous security coverage gap analysis

Continuous risk scoring based on security and business context

Risk-based vulnerability prioritization
(focus on crown-jewel systems)

Real-time identity inventory (human and non-human)

Executive dashboarding on what matters most to the business

Alert notifications and wide variety export options

Automated, continuous data driven synchronization and reporting

BUILT FOR FINANCIAL INSTITUTIONS.

Trusted by CISOs, MSSPs, and Compliance Teams navigating NYDFS.

"KeyCaliber gives us the visibility and prioritization we need to stay audit-ready without drowning in the noise."
